real-world range

REF 26" Fat Bike Pro, donor condition. Steel frame, 4" tyres.

The bicycle

REF is an Indian bicycle brand. Below is the seller's listing for the Fat Bike Pro Series 2021.

Frame	Steel
Wheels	26"
Tyres	4" wide knobby
Fork	Front suspension
Drivetrain	Seven-speed gear shifter
Brakes	Disc, front and rear
Handlebar	Alloy
Pedals	Beach cruiser
Supply	Shipped SKD internationally

Fitting the kit

The motor sits in the rear hub, so the rear wheel is replaced. Everything carried in that wheel goes with it.

Compatibility	Confirmed: the frame takes the Karaa rear hub motor.
Kept	Frame, fork, front wheel, both brakes, cockpit and cranks
Replaced	Rear wheel, rear hub and the seven-speed freewheel
Gearing after fitting	The motor takes a screw-on 6 or 7-speed freewheel, so the seven-speed rear range is retained.
Rim and tyre	A 4" tyre needs a fat rim laced to the motor flange, built to the donor's own width.

The Karaa kit: hub-motor wheel and removable 522 Wh battery.

The Karaa kit

Fitted to the rear wheel, which is rebuilt around the hub motor on stainless steel 13G spokes. The bicycle keeps its frame, fork, front wheel and cockpit.

Motor	250 W brushless DC geared hub, 36 V. Freewheels when off. Takes a screw-on freewheel and carries a disc mount, so rear gears and a rear disc brake are retained.
Power delivery	20 A continuous, 720 W at 36 V. 40 A over-current cut-off.
Battery	36 V 14.5 Ah (522 Wh) lithium-ion NMC, removable and lockable, IP54. 50 to 100 km per charge.
Controls	Pedal assist through the Karaa app over Bluetooth: climbing, eco, manual, cargo. Handlebar display shows speed, charge and assist.
Wiring and build	Waterproof 9-pin connector, battery to motor. Wheel laced on stainless steel 13G spokes.
Charger	42 V DC, 2 A. Input 110-240 V AC, 50/60 Hz. About six to seven hours.
Warranty	Motor 10,000 km or one year. Battery 500 cycles or one year. Charger: replaced only if a fault is reported within seven days of delivery.

Bicycle specification: seller's published product listing for REF. 26" Fat Bike Pro at almarfaamarine.com, read 21 September 2026. Compatibility with the Karaa rear hub motor confirmed by Karaa, 21 September 2026. Range: up to 120 km is a manufacturer maximum under ideal conditions; real-world range is 50 to 100 km depending on load, terrain, assist level, temperature and battery age, and a 4" knobby tyre costs range against it.

Specifications may be updated in future revisions. Deviations are recorded in the signed quotation. Pricing on request.
